

## PERFORMANCE

RAZR is a working chair with mesh backrest, certified to the origin, both in components and in its entirety, to achieve BIFMA standards, it implements class 4 KGS® pistons which guarantee maximum resistance over the years to the efforts.

The shaped seat is created for each size, the rounded shape in line with the design of the backrest or comfort and envelops the seat.

The synchro mechanism gives the chair a movement complete and intuitive.

## MATERIALS

All versions are available in fire-resistant and waterproof fabrics all the plastics used for the molding of RAZR are totally derived from virgin polymers. All completely PVC FREE to ensure maximum hygiene and the possibility of inserting the chair in any space. The structural plastics, are always double-sided, which, in addition to ensuring a better seal, also has an aesthetic function, covering the injection techniques. No internal part remains uncovered, technical and aesthetic caps have been designed to guarantee access to all the superposed surfaces, thus favoring the cleaning of the chair.

The BIFMA tests have confirmed one resistance even in recline, up to 150 KG.

The cantilevered base of  $\varnothing$  680 mm ensures a great stability even with the maximum extension of the piston, moreover the rubber wheels from  $\varnothing$  60 mm guarantee maximum smoothness on every surface.

**base:** aluminum

**coque:** PA black

**mesh:** white/black

**upholstery:** fabric - black/orange/green/red

**family:** task/managerial chairs

**maximum weight:** 160 kg

**seat depth:** 400 mm

**seat height:** 420 - 510 mm

**options:** fixed armrests

## DESIGN

The RAZR chair is a basic operating chair with mesh back.

The whole body is designed to be compacted without being disassembled, so as to place it under the worktops, so as to provide a compact and clean appearance to the whole space, as well as being very useful in tight and little open spaces.

RAZR is the perfect office chair for modern and contemporary offices, and it is perfectly suited to all meeting rooms and call centers.

The ideal support in public spaces such as receptions and welcoming areas.

The "T bridge" back support has both an aesthetic and structural function as it gives stiffness and at the same time allows a light and airy design to be maintained.

Each component is designed to homogenize with the design of the entire chair to create maximum comfort.
